**For Complete Satisfaction!**

## You're always welcome at Bejot Feed Lots!

Stop and meet our professional staff, enjoy a cup of coffee and have a friendly chat. With over 48 years of experience in feeding, Francis and his sons are here to provide full service to you and your cattle.

- Precondition calves
- Fatten all classes
- Winter cows or calves
- Complete grow/finish program
- Computer printouts
- Competitive cost of gain
- 9,000 head yard capacity
- Unlimited wintering capacity

At Bejot's, your cattle receive personal attention, along with quality feed, efficient service, and an excellent animal health program. Our goal is to make you a profit!

Your cattle are fed rations formulated by a consulting nutritionist, including home-grown irrigated corn, corn silage and supplements.

Our sloped lots are EPA approved and each is equipped with windbreaks and automatic waterers. The pens are walked each day, with any sick cattle pulled and tended to in one of our special treating areas.
